Projects

- Completed a Main Project on “**A VERIFIABLE SEMANTIC SEARCHING SCHEME BY OPTIMAL MATCHING OVER ENCRYPTED DATA IN PUBLIC CLOUD**”.

Description: The secure semantic optimal matching on the cipher text, we formulate the word transportation (WT) problem and propose a secure transformation technique to transform WT problems into random linear programming (LP) problems for obtaining the encrypted minimum word transportation cost as measurements between queries and documents.

For supporting verifiable searching, we explore the duality theorem of LP and present a novel insight that using the intermediate data produced in the matching process as proof to verify the correctness of search results.
